

# COMMITTEE AND MANAGER REPORT JULY 2019

## Swimming Pool

The pool area has been upgraded. We plan to convert to a salt-water pool.

This was a big repair job including the shower rooms, plumbing, electrics and roof. We re-installed the kids' slide and the waterfall

The upgrade is not finished. We will add palm trees, plants and more furniture and install free Wi-Fi.

## Ceilings / lights / painting

All the ceilings will be repaired this year for reasons of safety. We are running a new live cable for the lights, re-routing all the wiring and removing old wiring.

All the corridors will be painted and have LED lights

## Digital TV

Everyone should be using the 130 digital channels from Sophon. If you have an old analog TV, the manager will show you how to convert.

## Fibre optic internet

TOT have installed fibre optic. The cost is about 500 baht per month for 50Mbps if you pay a year in advance. Owners have said it is fast and reliable.

Maximum speeds are 200 Mbps and cost about 900 baht per month.
